Contents

No. 1 (January 1979)

PAGE

The health and performance of cows fed large amounts of urea. R. J. Treacher, A. J. Stark and K. A. Collis 1

Dynamic responses of the dairy cow's teat to step changes in pressure. S. Y. Reitsma and N. R. Scott 15

A frequency response of the dairy cow's teat. S. Y. Reitsma and N. R. Scott 27

Changes in the activity of lactose synthetase in the goat udder during pregnancy. E. A. Jones 35

Inhibitory effect of adrenaline on oxytocin release in the ewe during the milk-ejection reflex. T. Barowicz 41

Metabolism of [U-^{14}C; 2,3-^{3}H]-L-valine by the isolated perfused goat udder. E. Roets, A.-M. Massart- Leën, R. Verbeke and G. Peeters . . 47

Effects of increased supply of essential amino acids on the metabolism of the isolated perfused guinea-pig mammary gland. A. R. Peters, S. Alexandrov and T. B. Mepham 59

Effects of restriction of amino acid supply to the isolated perfused guinea-pig mammary gland. T. B. Mepham, A. R. Peters and S. Alexandrov . 69

Stereospecific distribution of fatty acids in bovine milk fat triglycerides. P. W. Parodi 75

Serological and fluorescence studies of the heat stability of bovine lactoferrin. A. Baer, M. Oroz and B. Blanc 83

Whey protein denaturation in heated milk and cheese whey. R. M. Hillier and R. L. J. Lyster 95

Thermal denaturation of α-lactalbumin and β-lactoglobulin in cheese whey: effect of total solids concentration and pH. R. M. Hillier, R. L. J. Lyster and G. C. Cheeseman 103

Effect of proteose-peptone on the heat gelation of whey protein isolates. R. M. Hillier and G. C. Cheeseman 113

Strains of *Streptococcus lactis* which contain β-galactosidase. J. A. E. Farrow and E. I. Garvie 121

Taxonomic relationships between *Streptococcus thermophilus* and some other streptococci. G. Ottogalli, A. Galli and F. Dellaglio 127

Reviews of the progress of Dairy Science: Swiss-type cheese. G. Mocquot . 133

No. 2 (April 1979)

PAGE

Title page i

Preface: D. T. Davies and C. Holt iii

Foreword: H. W. Kay v

Section A. Biological aspects of milk proteins

Biosynthesis and secretion of milk proteins. B. L. Larson 161

Study of the precursors of ovine lactoproteins: primary structures of the 'signals' and enzymic processing of prelactoproteins by mammary microsomal membranes. P. Gaye and J.-C. Mercier 175

Role of mammary casein kinase in the phosphorylation of milk proteins. E. W. Bingham 181

The carbohydrate portions of milk glycoproteins. P. Jollès and A.-M. Fiat 187

Post-secretory aggregation of caseins. B. E. Brooker and C. Holt . . 193

Section B. Milk proteins: comparative aspects, and the study of some of the minor caseins

Comparative aspects of milk proteins. R. Jenness 197

A genetic and biochemical analysis of a polymorphism of bovine α_{s2}-casein. F. Grosclaude, P. Joudrier and M.-F. Mahé 211

The formation and structure of some proteose-peptone components. A. T. Andrews 215

The formation of γ-caseins during cooling of raw milk. E. H. Reimerdes and E. Herlitz 219

Model proteolysis of β-casein by immobilized trypsin. E. H. Reimerdes . 223

Proteolytic activity in UHT-sterilized milk. C. Corradini and P. P. Pecis . 227

Buffalo α_{s0}-casein: isolation and characterization. P. Petrilli, L. Chianese and F. Addeo 231

Human β-casein. R. Greenberg and M. L. Groves 235

Section C. Association of proteins

Association of proteins. V. A. Bloomfield 241

A phosphate-induced sub-micelle–micelle equilibrium in reconstituted casein micelle systems. C. W. Slattery 253

Quantitation of α_{s1}-casein aggregation by the use of polyfunctional models. D. G. Dalgleish and T. G. Parker 259

PAGE

The kinetics of the precipitation of chemically modified α_{s1}-casein by calcium. D. S. Horne 265

The association of bovine SH-κ-casein at pH 7·0. H. J. Vreeman . . 271

On the size of monomers and polymers of β-casein. W. Buchheim and D. G. Schmidt 277

Structure of β-casein. S. Arima, R. Niki and K. Takase 281

Application of multiple regression analysis to sedimentation equilibrium data of α_{s1}- and κ-casein interactions for calculation of molecular weight distributions. S. Nakai and F. van de Voort 283

Section D. Casein micelles

Casein micelles: the colloid-chemical approach. T. A. J. Payens . . . 291

Developments in column chromatography for the separation and characterization of casein micelles. T. C. A. McGann, R. D. Kearney and W. J. Donnelly 307

CPG-chromatography studies on the stability of casein micelles. M. Larsson-Raźnikiewicz, E. Almlöf and B. Ekstrand 313

The voluminosity of bovine casein micelles and some of its implications. P. Walstra 317

Hydration of casein micelles: kinetics and isotherms of water sorption of micellar casein isolated from fresh and heat-treated milk. M. Rüegg, B. Blanc and M. Lüscher 325

The determination of the zeta potential of casein micelles. D. F. Darling and J. Dickson 329

The role of calcium, phosphate and citrate ions in the stabilization of casein micelles. J. Visser, R. W. Schaier and M. van Gorkom . . . 333

The binding of β-casein to hydroxyapatite: the effect of phosphate content and location. R. W. Sleigh, T. B. Sculley and A. G. Mackinlay . 337

The equilibria of calcium and phosphate ions with the micellar calcium phosphate in cow's milk. R. L. J. Lyster 343

Sub-structure of synthetic casein micelles. A.-M. Knoop, E. Knoop and A. Wiechen 347

Properties of artificial casein micelles. D. G. Schmidt 351

Physico-chemical characteristics of casein micelles in dilute aqueous media. P. F. Fox and B. M. Nash 357

PAGE

Interaction of ionic materials with casein micelles. M. L. GREEN and R. J. MARSHALL 365

Section E. Applied aspects of milk protein research

Utilization of milk proteins as starting materials for other foodstuffs. C. V. MORR 369

Theory for the heat-induced coagulation of a type A milk. T. G. PARKER, D. S. HORNE and D. G. DALGLEISH 377

The synergic effect of urea and aldehydes on the heat stability of concentrated skim-milk. D. D. MUIR, A. W. M. SWEETSUR and C. HOLT . 381

Heat stability in concentrated and non-concentrated milks – the effect of urea and β-lactoglobulin levels and the influence of preheating. R. J. PEARCE 385

Studies on the induction of heat stability in evaporated milk by preheating: effects of milk concentration, homogenization and whey proteins. D. F. NEWSTEAD, E. F. CONAGHAN and A. J. BALDWIN 387

Covalent bonds formed in proteins during milk sterilization: studies on caseins and casein peptides. D. LORIENT 393

Titrimetric studies on milk and milk products. O. KIRCHMEIER 397

Stability of buffalo casein micelles. N. C. GANGULI 401

List of participants 407

No. 3 (July 1979)

Milk yield and fertility of high-yielding dairy cows in a sub-tropical climate during summer and winter. Y. FOLMAN, A. BERMAN, Z. HERZ, M. KAIM, M. ROSENBERG, M. MAMEN and S. GORDIN 411

Major elements in milk of the West African dwarf goats as affected by stage of lactation. A. O. AKINSOYINU and I. O. AKINYELE 427

Inorganic constituents of milk: I. Correlation of soluble calcium with citrate in bovine milk. C. HOLT and D. D. MUIR 433

Electrophoretic mobility of casein micelles. D. F. DARLING and J. DICKSON 441

Observations on the influence of high cell count on lipolysis in bovine milk. A. M. A. SALIH and M. ANDERSON 453

Effect of free fatty acids on the amount of deposit formed from milk on heated surfaces. S. M. AL-ROUBAIE and H. BURTON 463

Effect of membrane perturbing treatments on the membrane-bound peptidases of A *Streptococcus cremoris* HP. F. K. EXTERATE 473

PAGE

Thermograms of *Streptococcus thermophilus* and *Lactobacillus bulgaricus* in single and mixed culture in milk medium. P. R. Monk 485

Effect of proteolytic raw milk psychrotrophs on Cheddar cheese-making with stored milk. B. A. Law, A. T. Andrews, A. J. Cliffe, M. E. Sharpe and H. R. Chapman 497

Lipid and protein composition of a membrane-rich fraction of butter oil. M. McCarthy and D. R. Headon 511

Cheddar cheese flavour studies. D. J. Manning 523

Chemical production of essential Cheddar flavour compounds. D. J. Manning 531

Headspace analysis of hard cheeses. D. J. Manning and C. Moore . . 539

Use of Laurell electrophoresis for the quantitative measurement of albumin in mastitic milk. A. M. Smith, J. M. Chesworth, G. D. Henderson and R. G. Rodway 547

Effect of various protein levels in the diet on mammary gland growth in rats. H. Pyska and H. Styczyński 551

Changes of blood catecholamine levels in the sheep during machine milking. T. Barowicz 555

Review of the progress of Dairy Science: The milk proteinase system. G. Humbert and C. Alais 559

Review of the progress of Dairy Science: Enzymes of psychrotrophic bacteria and their effects on milk and milk products. B. A. Law . . . 573

No. 4 (November 1979)

Autotransplantation of the goat mammary gland. M. Peaker and I. R. Fleet 589

Lipoprotein lipase of goat mammary tissue: comparison of extraction methods. Y. Chilliard 599

Effect of vacuum fluctuation during milking on the development of intramammary infection from teat duct colonization by *Staphylococcus aureus*. J. S. King, F. K. Neave and R. L. Williams 607

Relative importance of pre-partum and post-partum factors in the control of milk yield in the guinea-pig. S. R. Davis, T. B. Mepham and K. J. Lock 613

Effect of diet and stage of lactation on bovine milk lipolysis. A. M. A. Salih and M. Anderson 623

Relationship between trisaturated glyceride composition and the softening point of milk fat. P. W. Parodi 633

PAGE

Proteolytic specificity of chymosin on bovine α_{s1}-casein. D. M. MULVIHILL and P. F. FOX 641

Proteolysis and aggregation of casein micelles treated with immobilized or soluble chymosin. D. G. DALGLEISH 653

Application of reverse osmosis to the manufacture of dried whole milk and skim-milk. J. ABBOT, F. A. GLOVER, D. D. MUIR and P. J. SKUDDER . 663

Biospecific chromatography of chymosin on quinonated Sepharose and its application to enzyme content determination in rennets. F. DI GREGORIO, R. SISTO and F. MORISI 673

Role of yoghurt starter in cow's and buffalo milk. A. KHANNA and J. SINGH . 681

Effect of dietary protein level during pregnancy and 2 weeks of lactation on mammary gland growth in rats. H. PYSKA and H. STYCZYŃSKI . . 687

Review of the progress of Dairy Science: Mechanisms of formation of aroma compounds in milk and milk products. D. A. FORSS 691

Index of Subjects

Adrenaline, effect on oxytocin release, ewe, milk-ejection, 41
Albumin, mastitic milk, 547
Aldehydes, content, heat stability, milk, 381
Amino acids, supply, effect on metabolism, mammary gland, guinea-pig, 59, 69

Bacteria, *see also individual bacteria and types*
psychrotrophic, Cheddar cheese-making, stored milk, 497
enzymes, effect on milk, milk products (review), 573
starter, *see* **Starter(s)**
Blood, sheep, catecholamine levels, machine milking, 555
Buffalo(es), milk, yoghurt starter, 681
Butter oil, membrane-rich fraction, lipid, protein composition, 511

Casein(s), casein peptides, covalent bonds, milk sterilization, 393
interacting, molecular weights, 283
micelles, buffalo, heat stability, 401
colloidal properties, 291
electrophoretic mobility, 441
fractionation, 307
hydration, 325
ionic materials, interaction, 365
rennin, action, aggregation, 653
stability, 313
calcium, phosphate, citrate ions, role of, 333
sodium chloride, effect of, 357
synthetic, properties, 351
sub-structure, 347
voluminosity, 317
zeta potential, 329
post-secretory aggregation, 193
systems, sub-micelle-micelle equilibria, 253
α_{s0}-Casein, buffalo, isolation, characterization, 231
α_{s1}-Casein, aggregation kinetics, 265
polyfunctional, 259
proteolysis, rennin, 641
α_{s2}-Casein, polymorphism, 211
β-Casein, binding to hydroxyapatite, effect of phosphate content, location, 337
proteolysis, immobilized trypsin, 223
structure, 281
human, 235
monomers, polymers, 277
γ-Casein, formation, raw milk, cooling, 219
κ-Casein, proteolysis, rennin, 653
SH-κ-Casein, association, 271
Casein kinase, phosphorylation, milk proteins, 181
Catecholamine, levels, blood, sheep, machine milking, 555
Cell count, high, milk, lipolysis, 453
Cheddar cheese, flavour, volatiles, 523, 531, 539
making, stored milk, effect of proteolytic psychrotrophs, 497
Cheese, *see also individual cheese varieties*
hard, headspace analysis, 539
Cheesemaking, *see also* **Cheddar cheese**
whey proteins, heat denaturation, 95, 103
isolates, heat gelation, 113
Chymosin, *see* **Rennin**
Coagulation, milk proteins, heated, casein micelles, buffalo, 401
concentrated skim-milk, aldehydes, urea, added, 381
dialysis against water, effect of salts, 357
evaporated milk, preheated, effects of milk concentration, homogenization, whey proteins, 387
lactoferrin, 83
type A milk, theory of branching processes, 377
urea, β-lactoglobulin, content of milk, preheating, influence, 385
Cooling, milk, γ-caseins, formation, 219

Dairy products, *see also individual products*
flavour, volatiles (review), 691
psychrotrophic bacteria, enzymes, effect of (review), 573
titrimetric studies, 397
Diet, lipolysis, milk, 623
protein levels, growth, mammary gland, rats, 551, 687
urea, health, milk yield, 1
Disease, *see* **Mastitis**
Dried milk, manufacture, reverse osmosis, 663
Dried skim-milk, manufacture, reverse osmosis, 663

Emmental-type cheese (review), 133
Enzymes, *see also individual enzymes*
psychrotrophic bacteria, effect on milk, milk products (review), 573
Evaporated milk, preheated, heat stability, effects of milk concentration, homogenization, whey proteins, 387

Fatty acids, milk deposit, heated surfaces, 463
Fertility, in hot climate, 411
Flavour, Cheddar cheese, volatiles, 523, 531, 539
milk, milk products, volatiles (review), 691

β-Galactosidase, of *Streptococcus lactis*, 121
Goat(s), udder, lactose synthetase, pregnancy, 35
W. African, milk composition, lactation, stage, 427
Gruyère-type cheese (review), 133
Guinea-pig, milk yield, pre-partum, post-partum factors, 613

Heat stability, *see* **Coagulation,** milk proteins, heated
Heat treatment, *see also* **Sterilization**
milk, deposits, effect of free fatty acids, 463
skim-milk, cheese whey, denaturation, whey proteins, 95, 103
whey protein isolates, gelation, 113

Homogenization, evaporated milk, preheated, heat stability, 387
Hormone, *see* **Oxytocin**
Hydroxyapatite, binding of β-casein, 337

International Dairy Federation, Symposium on the Physics and Chemistry of Milk Proteins, 161–409

α-Lactalbumin, *see also* **Whey proteins**
heat denaturation, cheese whey, 103
Lactation, stage, milk, composition, W. African goat, 427
lipolysis, 623
Lactobacillus bulgaricus, *Streptococcus thermophilus,* single-, mixed-culture, milk, microbial thermograms, 485
Lactoferrin, heat stability, 83
β-Lactoglobulin, *see also* **Whey proteins**
content, milk, heat stability, 385
heat denaturation, cheese whey, 103
Lactose synthetase, udder, pregnancy, goat, 35
Lipolysis, milk, diet, lactation stage, effect of, 623
high cell count, 453
Lipoprotein lipase, mammary gland, goat, extraction methods, 599

Mammary gland, *see also* **Udder**
goat, autotransplantation, 589
lipoprotein lipase, extraction methods, 599
valine metabolism, 47
guinea-pig, amino acid supply, effect on metabolism, 59, 69
rats, growth, protein content, diet, during pregnancy, lactation, 687
to sexual maturity, 551
Mastitis, diagnosis, albumin content, milk, 547
Milk, calcium, phosphate ions, equilibria with micellar calcium phosphate, 343
coagulation, *see* **Coagulation**
flavour, volatiles (review), 691
lipolysis, effect of diet, lactation stage, 623
high cell count, 453
mastitic, albumin content, 547
membrane-rich fraction, lipid, protein composition, 511
proteinase system (review), 559
psychrotrophic bacteria, enzymes, effect of (review), 573
titrimetric studies, 397
type A, heat coagulation, theory of branching processes, 377
UHT sterilized, proteolysis, 227
Milk composition, elements, W. African goat, 427
soluble calcium, citrate, 433
Milk deposits, on heat treatment, effect of free fatty acids, 463
Milk fat, breakdown, *see* **Lipolysis**
free fatty acids, milk deposit, heated surfaces, 463
triglycerides, fatty acids, stereospecific distribution, 75
trisaturated glyceride composition, softening point, relationship, 633
Milk powder, *see* **Dried milk**
Milk proteins, *see also* **Lactoferrin, Proteins, Whey proteins**
biosynthesis, secretion, 161
breakdown, *see* **Proteolysis**
glycoproteins, carbohydrate portions, 187
heat stability, *see* **Coagulation,** milk proteins, heated
IDF Symposium, 161–409
ovine lactoproteins, precursors, 175
phosphorylation, casein kinase, role, 181
starting materials, other foodstuffs, 369
structure, association, 241
various species, evaluation, 197
Milk yield, guinea-pig, pre-partum, post-partum factors, 613
in hot climate, 411
urea, diet, 1
Milking, catecholamine level, blood, sheep, 555
oxytocin release, effect of adrenaline, ewe, 41
pressure changes, teat responses, 15, 27
vacuum fluctuation, udder infection, *Staphylococcus aureus,* from teat duct, 607
Milking machine, vacuum fluctuations teatcup, udder infection, 607

Oxytocin, release, during milk-ejection, effect of adrenaline, ewe, 41

Peptidases, membrane-bound, membrane perturbing treatments, *Streptococcus cremoris,* 473
pH, cheese whey, heat denaturation, whey proteins, 103
Pregnancy, lactose synthetase, goat udder, 35
Proteinase, milk (review), 559
Proteins, *see also* **Milk proteins, Whey proteins**
content, diet, growth, mammary gland, rats, 551, 687
Proteolysis, α_{s1}-casein, rennin, 641
κ-casein, casein micelles, aggregation, rennin, 653
UHT-sterilized milk, 227
Proteose-peptones, formation, structure, 215
heat gelation, whey protein isolates, 113

Rennets, enzyme content determination, chromatography, 673
Rennin, biospecific chromatography, quinonated sepharose, 673
proteolysis, κ-casein, aggregation, casein micelles, 653
α_{s1}-casein, 641
Reverse osmosis, manufacture, dried whole milk, skim-milk, 663

Separated milk, *see* **Skim-milk**
Skim-milk, concentrated, heat stability, aldehydes, urea, added, 381
dried, *see* **Dried skim-milk**
whey proteins, heat denaturation, 95
Staphylococcus aureus, teat duct, udder infection, vacuum fluctuation, milking, 607
Starter(s), yoghurt, cow-, buffalo-milk, 681
Sterilization, milk, caseins, casein peptides, covalent bonds, 393
UHT, proteolysis, 227
Storage, milk, Cheddar cheesemaking, effect of proteolytic psychrotrophs, 497
Streptococci, taxonomy, 127
Streptococcus cremoris, peptidases, membrane-bound, membrane perturbing treatments, 473

S. lactis, containing β-galactosidase, 121
S. thermophilus, *Lactobacillus bulgaricus*, single-, mixed-culture, milk, microbial thermograms, 485
taxonomic relationships, other streptococci, 127
Swiss-type cheese (review), 133

Teat, duct, *Staphylococcus aureus*, udder infection, milking, 607
responses, pressure changes, milking, 15, 27
Total solids, content, cheese whey, heat denaturation, whey proteins, 103
Transplantation, mammary gland, goat, 589
Trypsin, immobilized, β-casein, proteolysis, 223

Udder, *see also* **Mammary gland**
goat, pregnancy, lactose synthetase, 35
infection, *Staphylococcus aureus*, from teat duct, milking, 607
Urea, content, heat stability, milk, 381, 385
fed, health, milk yield, 1

Valine, metabolism, mammary gland, goat, 47

Whey proteins, *see also* **Lactalbumin, Lactoglobulin**
heat denaturation, skim-milk, cheese whey, 95
heat stability, preheated evaporated milk, 387
isolates, heat gelation, 113

Yoghurt, starter, cow-, buffalo-milk, 681
